|---|-----------------|-------------------------------------|----------------------------|
| <b>DevOps Engineer / Tech Lead</b>  | <b>IBM</b>      | <b>Typescript, Python, Java, Go</b> | <b>Mar 2021 -</b>          |
| <ul style="list-style-type: none"> <li>Designed DevSecOps pipeline using Gitlab, OpenShift, SAST, DAST, etc and led initial implementation</li> <li>Lead of a 4-person dev-ops initiative, focussing on designing, building, and optimizing systems</li> <li>Proposed reliability &amp; maintainability optimizations through system analysis and drove the implementation</li> <li>Automated infrastructure provisioning of a global minerals blockchain network with Terraform and Ansible</li> <li>Reduced cloud costs by 10% through improved container resource allocations and blackbox monitoring</li> <li>Increased productivity by writing a 12-factor project agnostic micro-service boilerplate in Typescript</li> </ul> |                 |                                     |                            |
| <b>Lead Engineer</b>  | <b>IBM</b>      | <b>Typescript, Python, Bash</b>     | <b>Mar 2019 - Feb 2021</b> |
| <ul style="list-style-type: none"> <li>Led 6-person team to build a vehicle supply chain blockchain and led initial launch and implementation</li> <li>Designed (cloud) infrastructure and CI/CD architecture using Kubernetes, Helm, Terraform, Concourse</li> <li>Improved reliability by designing and writing a database replicator with checkpointing</li> <li>Improved scalability by writing a dedicated query service, segregating reads from writes</li> <li>Improved reliability by automating backup and restore with Kubernetes cron jobs and bash scripts</li> <li>Increased deployment frequency fourfold by automating onboarding, load testing and versioning</li> </ul>  |                 |                                     |                            |
| <b>Software Engineer</b>  | <b>IBM</b>      | <b>Swift, Obj-C, Typescript</b>     | <b>Nov 2017 - Feb 2019</b> |
| <ul style="list-style-type: none"> <li>Led cloud migration to AWS, revamping 4 on-premise VM-based workloads for Kubernetes</li> <li>Proposed and designed an iOS architecture based on reactive (Rx) MVVM and drove the implementation</li> <li>Reduced overall iOS lead time by automating code signing and app store releases through Fastlane</li> <li>Reduced query response time while decreasing database load by writing a Redis caching layer</li> <li>Improved operability by writing a StatsD (white-box) domain agnostic telemetry layer</li> <li>Reduced production container memory footprint by 75% by utilizing Docker multi-stage builds</li> </ul>  |                 |                                     |                            |
| <b>Founder / Developer</b>  | <b>Musso</b>    | <b>Swift, Obj-C, Javascript</b>     | <b>Oct 2016 - Dec 2017</b> |
| <ul style="list-style-type: none"> <li>Designed, developed and released an iOS fitness tracking app with in-app purchases</li> <li><a href="https://appadvice.com/app/musso-gym-log-body-recovery-and-workout-builder/1216168371">https://appadvice.com/app/musso-gym-log-body-recovery-and-workout-builder/1216168371</a></li> </ul>   |                 |                                     |                            |
| <b>Developer Intern</b>   | <b>CWI</b>      | <b>Obj-C, Python</b>                | <b>Feb 2016 - Feb 2017</b> |
| <ul style="list-style-type: none"> <li>Developed iOS video sharing app, demonstrating SDN benefits in low bandwidth connection areas</li> <li>Increased network disruption tolerance by segmenting video uploads into smaller data chunks</li> </ul>  |                 |                                     |                            |
| <b>Dev &amp; UI Design Intern / Lead</b>  | <b>JogoJogo</b> | <b>HTML, Javascript, CSS</b>        | <b>May 2014 - Jan 2016</b> |
| <ul style="list-style-type: none"> <li>Built hybrid mobile kids apps with Appcelerator Titanium</li> <li>Promoted to Project Lead after 4 months, supervised an 8-person remote and on-site project team</li> </ul>   |                 |                                     |                            |

**AWARDS**

- IBM Outstanding Tech Achievement Award (2019): awarded annually for most innovative contributions
- IBM Client Excellence Award (2018): awarded quarterly to top performers based on client reviews
- Selected for IBM's 12-month top talent program (2019) based on leadership potential and performance

**CERTIFICATIONS**

- RedHat Certified Systems Admin (RHCSA)
- Certified Kubernetes Administrator (CKA)
- Professional Scrum Master (PSM1)

**PUBLICATIONS**

- Co-author: "Mobile Instant Video Sharing: Does More Information Help?" *ACM Multimedia*
- Blog: <https://fabijan-bajo.medium.com>

**PROJECTS**

- Webshop (2021): polyglot micro-service e-commerce project with a reactive iOS frontend and Kubernetes based infrastructure. Services written in Go, Java, Typescript and Swift
- Heart Disease Prediction (2018): machine learning project in Python (85% accuracy)

**SKILLS**

- Infrastructure: Kubernetes, Docker, Terraform, Helm, UNIX, IBMCloud, AWS
- Language: Python, Typescript, Swift, ObjC, Bash
- Current learning: GO lang
- Industry: government, vehicles, mining, e-com
- Technology: cloud, blockchain, mobile, web
- Personal: leadership, dependable, conscientious

**EDUCATION**

- University of Amsterdam, M.S.C. in Computer & Information Science (2016)
- University of Amsterdam, B.A. in Information Studies with Minor in Computer Science (2014)
